DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 3,241,344 to Peters.

Peters '344 discloses a lock housing (15); a closing cylinder (14); closing pins (column 2, lines 7-8); a sleeve (16); a locking bolt (30; column 2, lines 49-55); an electromagnet (38) activatable with a remote controller (figure 1; column 2, lines 56+).

As concerns claims 2 and 8, the locking bolt is spring biased (40) into a locked position (figure 1).

As concerns claim 4, a central locking system (50).

As concerns claims 5 and 10, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).

Art Unit: 3676

Allowable Subject Matter

3. Claims 3 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

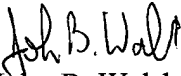

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
